

INNOVATIVE SOLUTIONS

Waste Management, Technical Services, Packaging, Logistics, and Disposal for Radioactive, Hazardous and Mixed Wastes

We are waste management professionals who possess the logistics assets needed to execute seamless, turnkey waste packaging, processing and transportation and disposal.

Our professional staff averages nearly 30 years of experience in waste management.

We're putting our experience to work in developing innovative, cost-saving

WASTE MANAGEMENT

NAC LPT LLC offers unbiased waste management services and we have no vested interest in any disposal facility. This allows us to recommend impartial solutions for the best value.

Our established disposal network enables us to direct wastes to the facilities closest to your project sites, often saving on transportation costs.

Our waste management personnel perform waste profiling and characterization, permit and package applications, disposal coordination, and on-site supervision.

NAC LPT's experienced project managers and certified shipping experts are dedicated to executing

your project in compliance with contractual requirements as well as all Federal, state and local regulations.

Our **Waste Management Services** include:

- Waste Processing
- Waste Characterization
- Manifesting, Documentation and Quality Assurance
- Marking, Labeling, Packaging and Container Inspection
- Waste Pick-up and Transportation
- Source Processing and Macro-Encapsulation
- Disposal

Count on NAC LPT for asset-based waste logistics, packaging, technical services, and disposal.

We can assist in the efficient and effective disposal of the following waste streams:

- Dry Active Waste (DAW)
- Metals/Equipment
- Soils and Asbestos
- Smoke Detectors
- Exit Signs
- Sealed and Check Sources
- Nuclear Gauges
- Thorium and Uranium Compounds
- Aqueous Solutions
- Liquid Scintillation Vials and Media
- Organic Liquids and Mixed Wastes
- High Curie Content Materials
- Classification of Unknowns
- Storage for Decay

We maintain contractual relationships with every waste processor and disposal site in the nation to ensure you have an identified outlet for your waste. This also reduces our customers' overall costs, providing you multiple outlets for your waste.
